The Grand United Order of Oddfellows Friendly Society is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

The product is a tax-exempt with profits endowment policy with contributions payable for a fixed term with a minimum of 10 years. **This document shows values based upon a policy term of fifteen years and an investor aged 65.**

Objectives

- To build a tax-free cash sum
- To allow you to take advantage of your friendly society tax exempt savings allowance.

The insurance benefits included in this plan are return of premiums paid plus 3% interest payable to your family should you die. The average cost of this life cover assuming your age is 65 is £2.34 per annum.

What are the risks and what could I get in return?

The Summary Risk Indicator (SRI) assumes you keep the product for 15 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. We have classified this product as 3 out of 7 which is a medium-low risk class. This rates the potential loss from future investment performance as medium-low. This is because you are entitled to receive back at least the Guaranteed Sum Assured at maturity. Any amount over this and any additional return depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before the maturity date or fail to make all your payments on time.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section "what happens if we are unable to pay you"). The indicator shown above does not consider this protection.

<ul style="list-style-type: none"> This table shows the money you could get back over the next 15 years, under different scenarios, assuming that you invest £1000 per year. The Guaranteed Sum Assured at maturity is £16,611. However, please note that the maximum contribution you can pay is £270 per annum or £25 per month. The scenarios shown illustrate how your investment could perform. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the plan. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back. 				
What happens if the Grand United Order of Oddfellows Friendly Society is unable to pay out?				
<p>If the Grand United Order of Oddfellows Friendly Society is unable to meet its liabilities, compensation may be payable by the Financial Services Compensation Scheme. Further information on the Scheme is available from the Financial Services Compensation Scheme on 020 7892 7300 or at www.fscs.org.uk.</p>				
What are the costs?				
<p>The reduction in yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.</p> <p>The amounts shown here are the cumulative costs of the plan itself, for three different holding periods. They include potential early exit penalties. The figures assume that you invest £1000 each year. The figures are estimates and may change in the future.</p>				
Costs over Time				
Investment Scenarios	If you cash in after 1 year	If you cash in after 8 years	If you cash in after 15 years	
Total Costs	£549	£2,365	£6,155	
Impact on return (RIY) per year	54.92%	4.63%	2.39%	

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.50%	The impact of the costs already included in the price. (This is the most you will pay, and you could pay less)
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.60%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1.29%	The impact of the costs that we take each year for managing your investments
Incidental costs	Performance fees	0.00%	The impact of the performance fee
	Carried interests	0.00%	The impact of carried interest

How long should I hold it and can I take the money out early?

It is important to remember that this plan is a long term contract.

- If you cash in within the first few years you may get back less than you have paid in.
- If you cash in at any time before the full term is up you will be penalised.

Recommended Minimum Holding Period

Taking into account the above information, the recommended holding period for the Plan is the full term of the Savings Plan which you agreed when you took out the Plan.

How can I complain?
